

Leonid Kadantsev

AI Automation & Integration Specialist

n8n · AI Agents · APIs · Workflow Automation

leonid.cordon@gmail.com • +380 50 478 32 77 • Ukraine → Slovakia • Remote / Relocation

TECHNICAL SKILLS

- ▶ n8n — self-hosted, workflow design
- ▶ AI Agents · LLM / Chat Models
- ▶ REST APIs · Webhooks · JSON
- ▶ CRM / Lead Automation
- ▶ Google Sheets · Data Tables
- ▶ AssemblyAI · Voice AI
- ▶ Docker · self-hosted environments
- ▶ Python — scripting & automation

LANGUAGES

Russian — Native

Ukrainian — Advanced

English — Intermediate

EDUCATION

Master's Degree

Automation of Production Processes

Donbas State Engineering Academy

Graduated with honors

GoIT — AI Automation (2026)

IT-BRAINS — Python (2024)

SkillUp — Software Testing / QA (2023)

PORTFOLIO

Project demos and case studies (Notion):

[AI Automation Portfolio →](#)

PROFESSIONAL SUMMARY

IT professional with 25+ years of experience in enterprise infrastructure, now specializing in AI automation and workflow integrations. Extensive background in designing, evolving, and operating mission-critical infrastructure, from enterprise server environments to hybrid cloud.

For the past five years, administered cloud-based virtual infrastructure, including server platforms, enterprise storage, backup and recovery, access management, and provisioning of environments for application development and operations.

Quick to learn new technologies and able to independently take solutions from architecture and deployment through to stable operation.

HANDS-ON PROJECTS

Voice AI Agent / “The Voice of Your Business”

n8n · APIs · Google Sheets · Data Tables · AI Agents · LLM / Chat Models · AssemblyAI. Automated voice interactions with call processing and analysis.

Wix Lead Automation & AI Qualification

Automated lead intake, AI-powered lead qualification, and delivery of data into downstream workflows.

AI Call Processing & Analytics

AI-driven call processing, information extraction, and analytics.

HouseBox — Ticket Routing & SLA Control

Automated ticket routing, SLA control, and a structured process for handling incoming requests.

PROFESSIONAL EXPERIENCE

Systems Engineer / IT Infrastructure Engineer

NKMZ · 2004-2026 (20+ years)

- ▶ Supported infrastructure for a large industrial enterprise: 70+ virtual machines, physical servers, storage systems, clusters, and 5,000+ users.
- ▶ Architected and operated virtual infrastructure, server platforms, and enterprise storage; handled backup and recovery, enterprise authentication, and access management.
- ▶ Led infrastructure development, including migration of approximately 90% of systems to a hybrid cloud environment and subsequent administration of the cloud platform.
- ▶ Operated cloud and Docker environments, provisioned infrastructure for developers and applications, and worked with vendors and development teams.

WHAT I BRING TO AUTOMATION

I build workflows with an infrastructure mindset, accounting for fault tolerance, access security, and system operations. I independently deploy and maintain self-hosted n8n, Docker, and any required integrations.
